STATEMENT OF THE WORK PROJECTS ADMINISTRATION

The total length of the Jones Pond road under construction is 3.731 miles. 1.363 miles of this road was completed previous to October 1, 1940, and is ready to tar this summer. The remaining 2.368 miles are now rapidly nearing completion, and it is expected that they will be ready for tar this summer.

When this section is completed and hard surfaced, it will be continuous from Route No. 1, Atlantic Highway, to Routh No. 186 at Prospect Harbor. This road will be one of the best of its kind in Maine.

This road is being built to State-aid specifications, under supervision of the State Highway Commission, W. P. A. and town officials. This project is one of the largest of its kind sponsored by a town and built by W. P. A. in Hancock county.

A power shovel and a State compressor have been employed, plus a number of town trucks and procurement trucks. The number of trucks varied, due to length of haul, etc., usually four town trucks, with drivers being paid by W. P. A., and

three procurement trucks were employed. Procurement trucks were paid 100 per cent by the W. P. A.

Some of the major work items since date of the last report, Feb 5, 1940 to January 31, 1941, are as follows:

1.981 miles of highway cut, cleared and burned.

2.0 miles of highway ditched (2 sides).

2.3 miles of shoulders built (2 sides).

9,662½ cubic yards of gravel hauled and spread.

Culverts installed for 2.231 miles of road. (19 culverts, 15-inch diameter to 36-inch diameter, for a total of 744 lineal feet).

14,387 cubic yards of earth cut. (This does not include cubic yards of sodded earth, stumps and boulders which were removed under grubbing and hauled to the dump).

One new gravel pit with two approaches at different elevations was opened and is being used at the present time.

One lost-time accident and a very low number of minor injuries have been experienced.

Federal expenditures Feb 5, 1940 to Jan 31, 1941 . . . \$26,133 03

Town expenditures, including tools, gravel, pow-

er shovel and compressor 11,435 20

Total expenditures as of above date \$37,568 23

The town is required by law to contribute 25 per cent. or more of the total cost of the project.

Note: The selectmen respectfully request that the voters and taxpayers of this town inspect the town books for confirmation of the above facts and figures, rather than be misled by idle and worthless estimates. All materials used pass the the inspection of the State Highway Commission engineers and W. P. A. authorities, and all money used is in anticipation of State-aid funds by permission of the State Highway Commission.

SCHOOL REPORT

To the Superintending School Committee and the Citizens of Gouldsboro:

I am transmitting herewith my annual financial report which shows a balance of \$.39 in the school account and \$5.40 balance in the repair account. The total recommendation for next year is \$8,420, as compared to \$7,820 last year. Although we are estimating a slight decrease in actual operating costs, the gain in appropriations needed is occasioned by a large decrease in income from the State through the school fund and equalization. As may be noted in the financial statement, next year's refund from the State will be approximately \$2,175, according to figures received from the Department of Education, as against a previous four-year, average State income of \$2,897.82, or a loss in supplementary income of \$722.82. Since the operating expenses must continue just about as they are, the decrease in State income must be made up by larger appropriations if the budget is to be balanced each year.

It has been brought to my attention by interested citizens that the school year in Gouldsboro should be increased from 32 weeks to 36 weeks in order that the pupils of the town be given equal educational opportunities with those towns having the longer school year. Despite the fact that the present Gouldsboro pupils are already showing results comparable to schools with the longer school year, I would favor the increase, should the town see fit to raise the additional funds necessary for the added expenditures. It would cost approximately \$200 a week for four weeks, or \$800 more than the budget asked for next year.

With the State income dropping off by about that figure, it would seem unwise to increase the operating costs when your probable total increase in necessary appropriations would be around \$1,500 over the average for the previous several years. Once the State income is increased to its former level and becomes fairly stable, I should gladly recommend adding a month to the school year, but not under the present circumstances; at least, not for the coming school year, with the uncertain world conditions of today.

R. H. HASKINS,
Sup't of Schools.

NURSING REPORT

To the Citizens of Gouldsboro, I hereby submit the report of the Nursing Service, beginning January 1, 1940, and ending December 31, 1940:

Early in January, after the winter weighing of 147 pupils was completed, attention was given to the Seven-Point program. The teachers were consulted regarding children who already qualified as Seven-Pointers, and others were told how and what corrections were necessary before becoming eligible for 1941 awards. In each case the nurse offered assistance in helping the family to secure the corrections.

Special Projects

During March and April the nurse assisted with the Cancer Prevention and Early Diagnosis Campaign. One thousand or more pamphlets on these subjects were placed in libraries, schools and stores. Each home received, through the schools, a set of Early Diagnosis pamphlets, and posters were exhibited in the schools and all public places.

For the third year, vaccination against smallpox was offered as a part of the school program. Nineteen were vaccinated by the doctor, arrangements being made and assistance given by the nurse.

A new school health protection this year was offered. The tuberculin test was offered to all school children whose parents signed the request slips put in each school by the nurse. X-rays for positive reactors were also a part of the program. One hundred and twenty-five school children received the test, with only one positive reactor, who when X-rayed was found to have no serious trouble. Seventeen children were immunized against diphtheria, and 25 received the Schick test.

Gouldsboro again took an active part in the school Health Day program on May 16. One hundred and sixty-eight Seven-Point children marched in the parade, headed by the Bar Harbor school band. Eleven more children qualified than last year. There were eleven 50 per cent and one 100 per cent. Seven-Point rooms, represented from Flanders Bay section. The honor of the one 10 per cent room goes to Gouldsboro for the second year—this year to the Geneva school at Birch Harbor. Pictures were taken, and Mrs. Theresa R. Anderson, R.

N., from the Maine Public Health Association office at Augusta, presented pins.

Infant and Child Welfare

All mothers were invited to bring their babies and pre-school children to the Winter Harbor annual all-day clinic on August 23. Dr. Reath was the examining physician. Helpful advice was given each mother. The opening week of school in September was given over to special inspection in each room for skin infection, and a sanitary inspection of the school building as well as playground equipment.

School Health Service

Annual school health inspection was completed in all rooms in September. Notices were sent to all parents where symptoms of defects were found, and a full report was left with each teacher and the superintendent of schools. Routine visits as well as special classroom inspections have been made during the year to help with health problems whenever needed.

Number of pupils inspected, 147. Number with defective teeth, 82; defective vision, 5; defective hearing, 1; defective glands, 10; defective throats, 16; 10 per cent. underweight, 3; orthopedic defects, 1.

Corrections secured: Defects of teeth, 25; defects of vision, 6; defects of throat, 4.

During the year, 424 instructive and investigative visits have been made on babies, pre-school school children, pre-natal patients, and tuberculosis contacts, as well as visits to give bedside care. Assistance was given at one delivery.

Eleven patients were taken to hospital, doctors and clinics in nearby cities. Twenty-seven school children have been taken to dentists and oculists for corrective work. All tuberculosis contacts and suspects have had X-ray follow-up as advised and home supervision given by the nurse.

The program is successful because everyone helps. I particularly thank the selectmen, teachers, superintendent of schools, doctors and citizens for making the program possible.

Respectfully submitted,

Flanders Bay Nursing Service,

CLYE H. RICKER, R. N.,
Public Health Nurse.

THE INFORMATION BOOTH

Summary report of the Gouldsboro-Winter Harbor Information Booth for the season of 1940:

Due to road construction and the poor tourist month of July, the number of calls at the booth was 23 less than for the season of 1939. However, of the 475 calls at the booth, nearly one-half were either deflected or directed to points within the two towns.

The need for road signs is still acute. It is very difficult for strangers to find the various points of interest, especially Schoodic Point. Adequate road signs should be placed at all cross-roads.

Another need in the development of our section is a detailed map of Route 186. These would not only be a great help in our local booth, but could also be placed in booths throughout the State.
